

## MEMBRANE SEPARATION SYSTEMS

A complete Spectrum of MEMBRANE SEPARATION SYSTEMS are offered, be it Reverse Osmosis, Nano, Ultra or Micro Filtration. Used as the latest technology for separation at molecular level for applications like :

• Brackish Water Treatment • Effluent Recycling, etc. Or

ENERGY CONSERVATION TECHNOLOGY for cold concentrations of Heat Sensitive Solutions.

Economic Solutions to conventional Thermal Evaporation.

Applications: Herbal Extract Concentrations, Dye Desalting and Concentration, Milk Concentration, Pure Water Applications.
